ACID-BUSTER™

Acid Scavenging Solution

Eliminate Acid Build-Up in AC&R Systems!

Acid-Buster™ is a ready-to-use **acid scavenging solution** for air conditioning and refrigeration units. It works much differently than common chemical neutralizers because instead of neutralizing, it chemically bonds with the acid in a system and keeps it in suspension until the acid can be absorbed by the filter dryer. This "scavenging" effect is very efficient and leaves behind no harmful residues that can cause component damage.

Specially formulated to remain safely in the system – Acid-Buster™ will not contaminate the refrigerant or lubricant. It works with **semi-hermetic**, and **hermetic compressors** and is compatible with all refrigerants and lubricants.

- **Prevents** compressor burnout
- **Cost-effective additive** to clean & prevent **acid buildup**
- Leaves **no harmful residue** behind
- **Twice as concentrated** as competitive solutions
- **Safe** for system components
- Direct, **reusable injector system** protects against overdosing

ACID-BUSTER™
EZ-Ject™ Injection Kit

AB-100CS

- **AB-5** (2) 0.5 oz (15 ml) EZ-Ject™ cartridges prefilled with ACID-BUSTER™ Acid Scavenging Solution
- **RP-EZ-50** EZ-Ject™ dye injector assembly
- **RP-EZ-25** 8 in (20 cm) EZ-Ject™ hose assembly
- **RP-AD-410A** R-410a adapter/purge fitting
- Service labels

Treats a **TOTAL** of up to:
4 tons (14.1 kW) **of cooling**

ACID-BUSTER™
EZ-Ject™ Cartridge

AB-5CS

- 0.5 oz (15 ml) EZ-Ject™ cartridge prefilled with ACID-BUSTER™ Acid Scavenging Solution

Treats up to:
2 tons (7 kW) **of cooling**

USE AS PREVENTATIVE MAINTENANCE IN AC&R SYSTEMS THAT ARE SHOWING SIGNS OF ACID BUILDUP OR HAVE EXPERIENCED A BURNOUT.
