

# WATER-GLO® ULTRA FLUORESCENT LEAK DETECTION DYES

**OEM  
GRADE**

**ULTRA** Fluorescent Dye - our **brightest, highest quality, and most advanced industrial-grade dye formula.**

The new **ULTRA** formula is independently tested for system compatibility and is filtered down to 2 microns. The result is a fully miscible, high-quality and non-particulate dye formulation that never compromises the integrity of the system.

The bottom line: these quality dyes will not change the viscosity or lubricity of any host fluid. They perform better under difficult conditions and have greater stability, making them the perfect tool for **long-term preventative maintenance and leak detection.**

## Fully Miscible

High Quality, non-particulate and filtered down to 2 microns. Won't change the viscosity or lubricity of host fluid.

## Exclusive Formula

Engineered to meet manufacturers' specifications.

## Improved Stability

More tolerant to extreme temperature range & moisture.

## Independently Tested

For system compatibility & will remain safely within the system.

## Improved Shelf Life

Up to 5 years

## SPE-WGG-8CS

Find leaks fast in industrial sized water and water/glycol-based fluid systems. Ideal for heat transfer fluid system applications, including boilers, chillers, geothermal heat pump systems and many more.

- ▶ Highly concentrated dye that fluoresces green
- ▶ Works with Violet Light, **SPE-HVL-CS** leak detection lamp
- ▶ Pinpoint leaks in piping, valves, condensers, seals, welds, and fittings
- ▶ Ideal for use as part of a diagnostic/preventive maintenance program

- ▶ 8 oz (237 ml) twin neck bottle
- Treats up to:
- ▶ **500 gallons (1,893 L)** of water
